Hiring Manager

Siemens Energy

Dear Hiring Manager,

I'm writing to express my interest in the Full Stack Developer position at Siemens Energy. As a Computer Science graduate with real-world experience building and deploying full-stack web applications, I'm enthusiastic about the opportunity to contribute to Siemens Energy's digital transformation and innovative engineering efforts.

Throughout my academic and project work, I've developed robust applications using technologies such as React, Next.js, Node.js, Express, MongoDB, and AWS. One of my key projects involved creating a cloud-native Google Drive alternative, where I implemented user authentication, real-time file upload, and PDF preview generation using Poppler and AWS Lambda. I also used Prisma for metadata management and established CI/CD pipelines to automate the development lifecycle.

I'm particularly inspired by Siemens Energy's mission to drive sustainability and digital innovation within the energy sector. I am eager to join a global leader that values both technical excellence and meaningful impact. My approach to engineering prioritizes clean code, modular architecture, and

Garv Thakral

continuous learning-principles I believe align with Siemens Energy's engineering culture.

Alongside my technical experience, I bring strong problem-solving abilities, a collaborative mindset, and a passion for building systems that improve lives. I thrive in fast-paced environments and am excited about contributing to a multidisciplinary team solving real-world challenges.

Thank you for considering my application. I've attached my resume and would welcome the opportunity to discuss how I can contribute to your team at Siemens Energy.

Warm regards,

Garv Thakral
